Sections explained

- 1. **Header** — Company logo and address, proforma number, date, validity date, quotation reference, contact person, contact number, and payment/delivery terms.
- 2. **Bill To / Ship To** — Customer and shipping party details including code, address, state, and GSTIN. Separate bill-to and ship-to parties are supported.
- 3. **Items Table** — Additional columns include Item Code, Length in mm, and Delivery Days. The last row shows the item total before extra charges.
- 4. **Tax Treatment** — Intra-state uses CGST + SGST. Inter-state automatically switches to a single IGST column. Missing ship-to state blocks proforma generation.
- 5. **Bottom Left** — Comments, amount in words, and terms & conditions.
- 6. **Summary Box** — Taxable value, total tax, extra charges (cutting, other, weighing, delivery, testing), and grand total.
- 7. **Signature** — Authorized signatory block.

Shahnaz CRM — Integration Guide

Generated on 2026-09-04 · All external APIs, schedulers, and data flows in one place

#	Integration	Direction	Status
1	Email to Lead (Microsoft 365 Graph)	Inbound	Configured & Tested
2	Quotation Send (SMTP + PDF)	Outbound	Configured
3	Proforma Invoice Send + SO Creation	Outbound / Internal	Configured
4	Product Pull from ERP (SQL Server)	Inbound	Configured
5	Sales Order Push to ERP	Outbound	Configured & Tested
6	Purchase Order Push to ERP	Outbound	Configured
7	Lead Ingestion API	Inbound	Configured
8	Currency Exchange Rates	Inbound	Configured
9	Cron / Scheduled Jobs	Internal	Configured

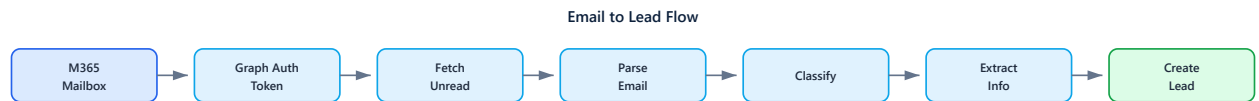

1 Email to Lead Extraction

- Configured & Tested

Polls a Microsoft 365 mailbox via the Graph API, reads unread emails, classifies them, extracts lead information, and creates leads automatically.

Env vars: MS_GRAPH_CLIENT_ID MS_GRAPH_CLIENT_SECRET MS_GRAPH_TENANT_ID
MS_GRAPH_MAILBOX CRON_SECRET INTERNAL_COMPANY_ID INBOUND_MAX_MESSAGES_PER_RUN

Files: lib/inbound-email-service.ts, lib/email-classification.ts, lib/email-extractor.ts, lib/leadWorkflow.ts, app/api/cron/email-poll/route.ts, instrumentation.ts

- **Trigger:** POST /api/cron/email-poll with CRON_SECRET, or automatic 2-minute polling in production.
- **Output:** New Lead with code, assignment, SLA deadline, and notification.

2

Quotation Send

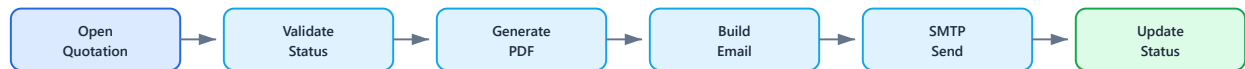

- Configured

Generates a branded quotation PDF and emails it to the customer or contact. Updates the quotation status and creates a follow-up task.

Env vars: SMTP_HOST SMTP_PORT SMTP_USER SMTP_PASS SMTP_FROM
NEXT_PUBLIC_APP_URL

Files: app/api/quotations/[id]/send/route.ts, lib/email.ts, lib/generateSukiQuotationPdf.ts

Quotation Send Flow

- **Trigger:** Send button on the quotation detail page.
- **Status transition:** Draft / Approved / UnderReview → Quotation Sent.

3 Proforma Invoice

- Configured

Two related flows: (A) email a proforma PDF to the customer, and (B) convert an approved proforma invoice into a sales order.

Env vars: SMTP_HOST SMTP_PORT SMTP_USER SMTP_PASS SMTP_FROM

Files: app/api/proforma-invoices/[id]/send/route.ts, app/api/proforma-invoices/[id]/sales-order/route.ts, lib/email.ts

- **Send trigger:** Send button on proforma detail page. Status must be Draft or Sent.
- **SO creation trigger:** Create Sales Order button on approved proforma. Computes totals, tax, and saves the order.

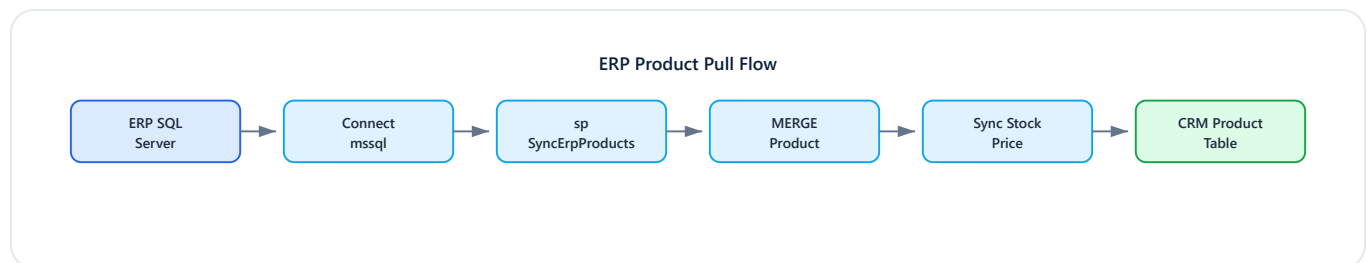

4 Product Pull from ERP

- Configured

Connects directly to the ERP SQL Server database and MERGEs product master data, stock levels, prices, categories, and grades into the CRM Product table.

Env vars: ERP_ADMIN_PASSWORD

Files: scripts/erp-sync-poller.mjs, __run_erp_sync_now.mjs, scripts/erp-product-sync.sql, scripts/erp-category-sync.sql

- **Schedule:** Products every 2 minutes, categories every 24 hours.
- **Source:** ERPDb_SHAHNAZ_CHE.dbo.PRODUCT and daily_trans on 192.168.1.160:1433.

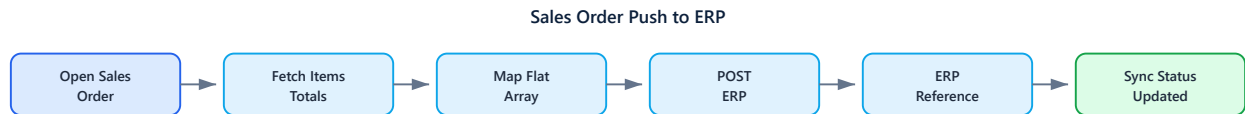

5 Sales Order Push to ERP

- Configured & Tested

Builds a flat JSON array payload for the ERP and POSTs it to the SUKI ERP sales order endpoint. Updates sync status and stores the ERP reference.

Env vars: SUKI_ERP_API_URL SUKI_ERP_API_KEY

Files: app/api/sales-orders/[id]/sync-erp/route.ts

- **Trigger:** Sync to ERP button on the sales order detail page.
- **Endpoint:** {SUKI_ERP_API_URL}/saleOrder
- **Format:** Flat JSON array containing item-level and order-level fields.

6

Purchase Order Push to ERP

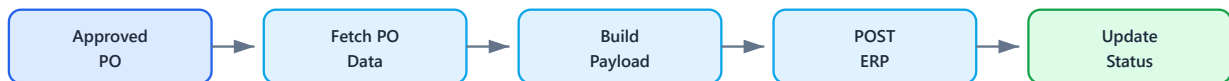

- Configured

Similar to the sales order flow but for purchase orders. Sends an approved PO payload to the ERP.

Env vars: SUKI_ERP_API_URL SUKI_ERP_API_KEY

Files: app/api/purchase-orders/[id]/sync-erp/route.ts

Purchase Order Push to ERP

- **Trigger:** Sync to ERP button on the purchase order detail page.
- **Status guard:** PO must be Approved.

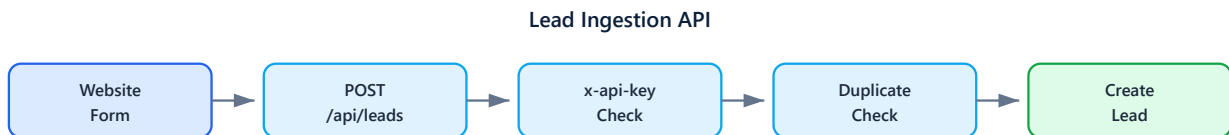

7 Lead Ingestion API

• Configured

Exposes a secure REST endpoint so external websites or landing pages can create leads in the CRM.

Env vars: LEADS_API_KEY INTERNAL_COMPANY_ID

Files: app/api/leads/route.ts, lib/leadWorkflow.ts

- **Endpoint:** POST /api/leads
- **Auth:** Header x-api-key matching LEADS_API_KEY or systemConfig leads_api_key.

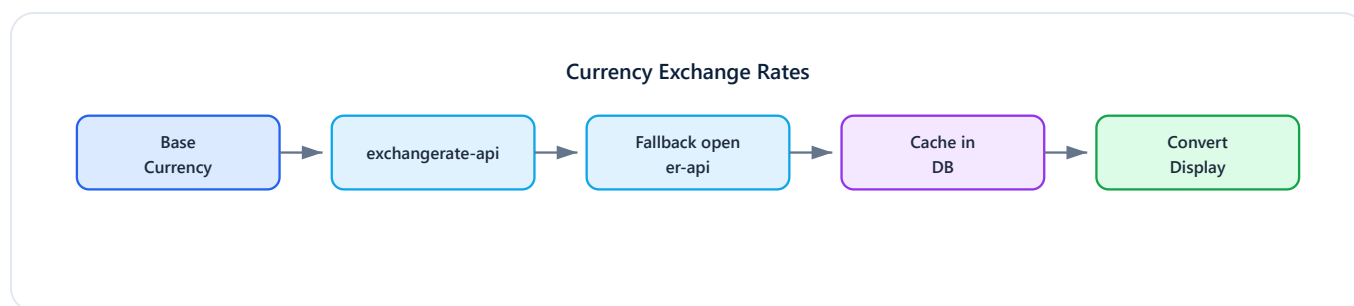

8 Currency Exchange Rates

• Configured

Fetches live INR/USD/EUR exchange rates, caches them in the database, and converts/format amounts for display.

Env vars: `EXCHANGE_RATE_API_KEY`

Files: `lib/currency.ts`

- **Primary source:** `exchangerate-api.com`
- **Fallback source:** `open.er-api.com` (free, no key)
- **Cache:** ExchangeRate table, refreshed every 24 hours.

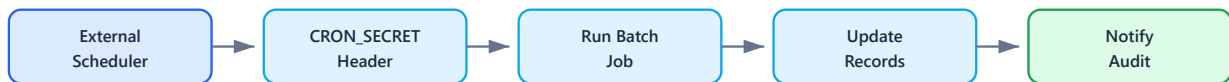

- Configured

Protected HTTP endpoints designed to be called by an external scheduler such as Vercel Cron, Azure Functions, or a local cron job.

Env vars: CRON_SECRET CRON_API_KEY

Files: app/api/cron/email-poll/route.ts, app/api/cron/nightly-batch/route.ts, app/api/cron/proposals/route.ts, app/api/cron/subscriptions/route.ts, app/api/quotations/expire-stale/route.ts

Cron Scheduled Jobs

- **Email poller:** Also auto-starts in production via instrumentation.ts every 2 minutes.
- **Other jobs:** Expire stale proposals, nightly account aging, birthday reminders, PO auto-hold, stale quotation expiry.
